Professional Summary

Software Developer with hands-on experience in Java, Spring Boot, MySQL, PostgreSQL, and Machine Learning. Currently interning at Tide (UK-based FinTech), building SQL-based fraud detection and transaction monitoring rules on Google BigQuery. Focused on clean backend logic, database querying, and applying data-driven rules to real-world financial problems. Actively seeking full-time opportunities to apply my problem solving skills in a fast-paced environment.

Experience

Data Analyst Intern

March 2026 – Present

Tide India, Delhi

(Fintech – Transaction Monitoring & Fraud Detection)

- Write and optimize complex SQL queries on **Google BigQuery** to build transaction monitoring **Baseline rules** for fraud detection across business accounts.
- Developed Baseline rules to flag suspicious financial behaviour — such as businesses with disproportionate cumulative debit volumes (e.g., transactions exceeding 50,000 thresholds) or anomalous spikes in single-day highest debit amounts.
- Built rolling-window aggregation logic using **BigQuery window functions** (PARTITION BY, RANGE BETWEEN, DENSE_RANK) and UNIX date arithmetic for 5-day, 10-day, and 25-day lookback periods.
- Worked with a multi-table schema (business, account, transaction) joined across unique business and account identifiers to exclude pre-approved partner accounts and isolate genuine suspicious activity for accurate fraud signals.

Education

Vivekananda Institute of Professional Studies (GGSIPU), Delhi

2022 – 2026

B.Tech Computer Science Engineering (Machine Learning & Software Development)

Skills

- **Backend Development:** Java, Spring Boot, JDBC, RESTful APIs
- **Databases & Data:** MySQL, PostgreSQL, SQL Queries, Google BigQuery, Schema Design, Window Functions, Data Warehouse Fundamentals
- **Machine Learning:** Supervised & Unsupervised Learning, Regression, Classification, Clustering, Model Evaluation
- **Deep Learning Concepts:** Neural Networks, Activation Functions, Backpropagation, Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), Large Language Models (LLM)
- **CS Fundamentals:** Operating Systems, Computer Networks, Distributed Systems, Cloud Computing
- **Concepts:** OOP, Data Preprocessing, Debugging, Problem-Solving
- **Tools:** Git & GitHub, Postman, Java, C

Projects

AI-Enabled Fitness Tracking System using Microservices

- Built a full-stack fitness tracking system using Java Spring Boot with a microservices architecture.
- Implemented service discovery, centralized configuration, and API Gateway using Spring Cloud components.
- Developed asynchronous inter-service communication using RabbitMQ for activity data processing.
- Integrated AI-based recommendations using Gemini API through a dedicated AI microservice.
- Secured services using Keycloak with OAuth 2.0 and PKCE authentication flow.

Personal Portfolio Website

- Designed and developed a personal portfolio using React to showcase projects, skills, and profile information.
- Built reusable components and implemented responsive UI for clean presentation.

Certifications

- Full Stack Web Development Training — TechStack (ISO 9001:2008 Certified), 2025
- Data Structures & Algorithms and MERN Stack Training — AccioJob, 4-week industry training

Achievements & Extracurricular

- Represented state-level cricket and currently playing competitive league cricket under DDCA (Delhi & District Cricket Association).
